## PROJECTS

- **Automatic active phase selector by using arduino**

Phase absence is a very common and sever problem in any industries. most domestic loads are connected to the single phase supply and if the fault occurs in any one of the phase and power is available in other phases, we cannot use that power. By using this project we provide the continues power supply to the consumers.

- **Automatic street lighting by using LDR.**

By using light depending resistors we can control the turn on and off of street lights depending upon the sunlight. This makes the system energy efficient and automatic
